PROFESSIONAL SUMMARY

Flutter Developer with 6+ years of professional experience in mobile and full-stack development. Currently building financial mobile applications at BYONDIT, working on CrediClub (Mexican fintech). Proven track record delivering production-grade apps used by millions, including Tigo Money (Millicom). Skilled in Flutter, Dart, Python, C# .NET, and Node.js with strong expertise in fintech, app security, and scalable architectures. Systems Engineer passionate about clean code and innovative solutions.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Freezed, RiverPod, BLoC, React Native, Push Notifications, DataTheorem SDK

Backend Development: Python, Node.js, Express, C# .NET Core, ASP.NET, REST APIs, Azure Functions, Redis

Frontend Development: Next.js, React, HTML, CSS, JavaScript, TypeScript

Databases & Cloud: PostgreSQL, MySQL, Firebase, AWS (Bedrock), Azure (Functions, Queues)

Tools & Methodologies: Git, SCRUM, Agile, CI/CD, RBAC, Biometric Authentication (FaceTec)

PROFESSIONAL EXPERIENCE

Flutter Developer | BYONDIT

Oct 2025 – Present | Remote

- Develop and maintain CrediClub mobile app, a financial platform for a Mexican bank, as part of the Byondit team
- Integrated and configured DataTheorem SDK for app security across development, staging, and production environments
- Built screens and features for physical and digital debit cards: information display, card blocking/unblocking, and soft token management
- Resolved critical production bugs blocking investment flows and other defects in production environments
- Configured push notifications and co-designed a generic, reusable metadata structure for routing and data handling
- Refactored screens and widgets applying best practices and design patterns for improved maintainability

Founder & Developer | Overinn (Acaluva)

Nov 2024 – Present | Remote

- Founded and developed Acaluva, an AI-powered management platform for independent educators, academies, and training centers
- Designed and built a flexible academic management system with hierarchical structures (virtual sessions, programs, levels, groups) and customizable grading scales
- Developed a financial module with recurring billing, payment tracking, and expiration alerts
- Implemented RBAC permission system for educators, coordinators, administrators, and students
- Integrated AI assistant using open-source models for in-app queries and support
- Currently in beta with active early customers (acaluva.overinn.com)

Backend Developer | Hypernova Labs

Sep 2024 – May 2025 | Remote

- Developed backend for Kiosko de Cochez, a self-service application deployed in physical retail stores
- Implemented and maintained backend requirements using C# .NET Core and ASP.NET
- Ensured performance and scalability of developed services while meeting quality standards
- Collaborated with cross-functional technical teams in an agile environment

Full Stack Developer | Op-Tech Outsourcing Partners

Jan 2024 – Sep 2024 | Remote

- Developed an administrative portal for automotive workshop management meeting client and market requirements
- Contributed to Radar, an AI-powered platform using AWS Bedrock models for customs document analysis and comparison, generating automatically marked PDF files
- Implemented full-stack features focused on efficiency, automation, and user experience for logistics and customs sector clients

Full Stack Developer | BYONDIT (Tigo Money / Millicom)

Jan 2023 – Dec 2023 | Remote

- Developed Tigo Money mobile app (Millicom), a digital wallet used by millions of users in Central America
- Implemented login and onboarding processes, improving security and usability
- Built mobile top-up and remittance features for cash-in and cash-out operations
- Maintained Flutter frontend and developed Python APIs for remittance queries and biometric verification with FaceTec

Backend Developer | HyperNova Labs

Jul 2021 – Dec 2022 | Remote

- Developed integration projects and APIs using C# .NET Core and ASP.NET for enterprise clients
- Led integrations with NAF Ivend via Azure Functions and Queues
- Optimized data loading processes with Node.js and Redis, improving response speed and efficiency
- Maintained and developed SaaS-PIM (Product Information Management) services under SCRUM methodology
- Led a tracking system to standardize communication across external systems

Backend Developer | Qor Development, LLC

Feb 2020 – Jul 2021 | Remote

- Developed TypeMatch mobile app backend using Node.js, Express, and MySQL, improving matching logic accuracy
- Connected external APIs and improved book management logic in Kidlind, an educational app
- Enhanced user experience in TypeMatch by integrating AgileCRM for interaction and profile management

EDUCATION

Systems Engineer — Universidad Nacional Autónoma de Nicaragua (UNAN)

2017 – 2021

CERTIFICATIONS

- React Native CLI
- Frontend Developer
- Node.js: De cero a experto
- Básico de Python
